Originally Established	Current
(under DOI or with DOI as co-	(Currently under DOI or with
owner)	DOI as co-owner)
193	123

Notes:

The "National Monuments Data" tab includes National Monuments that were established under other Federal Agencies (such as NOAA, and Forest Service). These monuments were included in this data call as a number of the monuments have been transferred between DOI and the Forest Service. The data is sortable, which allows for different views (such as including or excluding the Forest Service National Monuments).

National Monuments that were abolished or re-designated as a National Park, Refuge, Preserve, or Seashore or transferred to an external agency are also included in this data call. See column B in the "National Monuments Data" tab for DOI Bureau name (or other non-DOI agency name) and latest designation (if no longer a National Monument).

Per BLM, courts give deference to BLM and the Resource Objects and Values (ROV's) that are further defined by BLM through NEPA, in addition to the more general nature of the Proclamation language. For reference, the BLM ROV's are included in the "National Monuments Data" tab under Column K for each BLM managed National Monument.
